Seize The Moment With Grip That Won't Slip

Elite Sport uses only specially-formulated and patented latex to achieve unrivalled grip, comfort and flexibility, without sacrificing durability. All Elite goalkeeper gloves are match-ready, with our high-quality latex on the palm, backhand and wrist strap.

The Winning Goalkeeper May Be The One Who Reached Just A Bit Farther...

To ensure Elite Sport gloves stretch comfortably with the hands, not against them, there are 5 to 7 elastic panels of material in every glove, depending on the model.

Even The Best Defense Needs Reinforcements

Goalkeepers' fingers can be vulnerable to impact, so Elite Sport gloves defend you, while you defend the goal. Elite gloves are constructed with either 4 or 5 removable finger supports (spines) produced to safeguard and provide maximum protection...the goalkeeper's armor.

Be Impenetrable. We've Got Your Backing

All Elite gloves have 4 or 5 mm of cushioned backing foam, combined with Elite Sport's proprietary latex and high tech fabric. Gloves are sufficiently reinforced in the Shock Zone to protect the hands when punching and blocking incoming balls. Elite's proprietary latex ensures they have extended durability with frequent, aggressive use.

Some Shock Zones are flat, while others feature Elite's specially-constructed 3D embossing.

Cool Gloves. Cool Hands.

Because goalkeepers already have plenty of reasons to sweat, Elite Sport has developed a high-tech fabric that features Air Ventilation Management AVM™ to enable air circulation within the gloves. When the hands stay cool, the head can stay cooler.

Details In The Palm Of Your Hands

Every surface of Elite Gloves is critical to the goalkeeper's style and technique.

So, naturally, Elite Sport has five models of palm cuts: **Roll**, **Negative Roll (NRoll)**, **Negative**, **Hybrid** (2 Roll, 2 Negative) and **Flat**.

The truly experienced goalkeeper will also want to choose the wrap design, based on how they use the outer edge of their hands: wrapped thumb, double wrapped thumb or side wrap. ➡
